### ELBIO FERNÁNDEZ

HIGHSCHOOL  
2000-2005

I'm a web developer with 10 years of experience, Javascript, PHP, HTML & CSS emphasized. I challenge myself to achieve excellence and commitment.

## EXPERIENCE

### GLOBANT | SEMI SENIOR WEB DEVELOPER

Dec 2013 – Jan 2018

- I worked in several large scale projects with extensive use of Angular, Bower, Grunt and Jasmine/Mocha.
- Among the projects I was involved in: Autodesk, Metromile and National Geographic.
- All the projects demanded compliance with code standards, unit testing and high communication skills when working with remote teams.
- High degree of understanding of Git and branching best practices.

### BENOIT | SECURITY ANALYSIS & SOFTWARE ENGINEERING

Jan 2013 – Sep 2013

- I worked on several Ruby projects implementing Spree e-commerce platform and Refinery CMS.
- Development required BackboneJs and Ruby On Rails.
- Handled security reports and data analysis for private networks using OSSIM Alien Vault platform. It required Ruby scripting.

### FARM.CO | QUALITY ASSURANCE & PHP DEVELOPER

Ago 2012 – Nov 2012

- Worked on the implementation of Jenkins and Behat servers. Among other testing tasks, I was in charge of developing testing processes.
- PHP projects relied on Symfony and Doctrine frameworks and demanded strict code standards.

### TAKEOFF MEDIA | WORDPRESS DEVELOPER & ADVISOR

Oct 2010 – Ago 2012

- I was in charge of refactoring and maintaining the DIRECTV Sports portal. This required theme and plugin development from scratch.
- Created a WordPress plugin meant to synchronize 50+ blogs in a multi-site install, developed for Walmart network.
- Worked on a PHP tool to keep track of tasks and resources in Jira and Basecamp, using Doctrine and Symfony

### LEDON WEST | FRONTEND DEVELOPER

May 2010 – Oct 2010

- Took part in the restructuring of Startups.com, based on PHP/Codeigniter. The job required shell scripting as well.
- In the phase that followed, I worked on the migration to OSQA, a platform developed with Django.

### TIMBA | QUALITY ASSURANCE & SALESFORCE DEVELOPER

Jul 2008 – Jan 2010

- Developed for several projects for the Salesforce platform.
- Worked on automated testing based on Selenium and Java.
- Regular unit testing and writing of QA documentation.
